(54) ELECTRONIC ENDOSCOPE SYSTEM

(57) Abstract:

PURPOSE: To provide the electronic endoscope system which can display simultaneously plural images obtained from plural photographing elements on one high vision monitor without causing the deterioration of resolution.

CONSTITUTION: The system is provided with an electronic endoscope 2 provided with plural CCDs 7a to 7e, a controller 3 for executing a signal processing to output signals of these CCDs 7a to 7e, and also, generating one video signal by synthesizing plural images, and a high vision monitor 4 for displaying the video signal outputted from this controller 3, and constituted so that plural images can be displayed simultaneously on this monitor screen.
